

The FMI is an international biomedical research center, is part of the Novartis Research Foundation and is affiliated with the University of Basel. Situated in Basel, Switzerland, the FMI offers an outstanding scientific and cultural environment in the center of Europe.

The logo for the Friedrich Miescher Institute for Biomedical Research (FMI) consists of the letters 'FMI' in a bold, dark green, sans-serif font.

Friedrich Miescher Institute
for Biomedical Research

Head of Facility for Advanced Microscopy and Imaging

The Friedrich Miescher Institute for Biomedical Research invites applications for the position as head of the Facility for Advanced Microscopy and Imaging (FAIM). We are seeking an individual with extensive knowledge, expertise and a demonstrated track record in microscopy and optical engineering in a biological research environment. Practical experience in optical techniques such as multiphoton and/or superresolution microscopy, as well as image processing and digital data management is important. The successful candidate will have a talent for leadership, strong communication skills and experience in the successful supervision of co-workers. Management experience in a microscopy and imaging laboratory is an advantage.

Employment conditions at the FMI are highly competitive. Have we raised your interest?

Applications, including a CV and names and emails of three referees should be submitted online at:

www.fmi.ch/opening

Informal inquiries can be sent to:

Dr. Antoine Peters or to
Dr. Susan Gasser
Antoine.Peters@fmi.ch
Susan.Gasser@fmi.ch

The closing date for applications is
September 11, 2011.
